Dear Ms. Parker:

I am sending you copies of the General Electric Company, Conneaut Base Plant, Certification of Change in Status and related background materials to be made available to the public at the Public Library, for review and comment through March 18, 1985. I am enclosing an advance copy of the Public Notice advising the availability of these materials at the library. The Public Notice is scheduled to be published in the Conneaut News-Herald on February 15, 1985.

Please return the materials in the enclosed self-addressed envelope following the close of the 30-day comment period on March 18, 1985. Also please let me know that you have received this material by completing and signing the enclosed verification form and returning it in the self-addressed, postage and fees paid envelope.

Thank you for your assistance in making these materials available to the public for review.

Sincerely,

Michael Obo
Environmental Protection Assistant

No. 86-223

EPA INVITES PUBLIC COMMENT ON GE CLOSURE PLAN

U.S. Environmental Protection Agency (EPA) today announced a public comment period on a closure plan submitted by General Electric Co. (GE), Conneault Base Plant to certify its change in status.

The plant at Reig and Maple Aves., Conneault, OH, was previously classified as a hazardous waste storage facility under the Federal Resource Conservation and Recovery Act (RCRA).

To change its status, GE removed all the hazardous waste it had stored for more than 90 days and limited its present accumulation to fewer than 90 days, as required by RCRA. The closure plan outlines the procedures used in the removal. GE is now classified as a small quantity generator of hazardous waste.

Before approving GE's closure plan, EPA must ensure that the removal was performed in a manner that protects human health and the environment and that any releases of hazardous waste (or hazardous waste constituents) are cleaned up to extent necessary.

- more -

EPA encourages comments from anyone who has information about any release of hazardous waste (or hazardous waste constituents) in the air soil, water, or groundwater around the facility.

Copies of the certification and background material are available to the public at the U.S. EPA, Solid Waste Branch, 230 South Dearborn St., 13th Floor, Chicago, IL 60604; (312) 886-3715; from 8:30 a.m. to 4:30 p.m., Monday through Friday, and during regular business hours at the Northeast District Office of the Ohio EPA, 2110 East Aurora Rd., Twinsburg, OH; (216) 425-9171.

Written comments must be postmarked by September 15, 1986, and sent to:

U.S EPA Region 5

PUBLIC NOTICE

The U.S. Environmental Protection Agency (U.S. EPA) has received a certification of change in status from General Electric Company, Conneaut Base Plant (GE), Reig Street and Maple Avenue, Conneaut, Ohio. GE stores hazardous waste in containers. This action will change the status of the GE facility from a storage facility to a generator storing for fewer than 90 days (per 40 CFR 262.34). The change in status for the facility was effected by removing hazardous waste stored for longer than 90 days and by limiting the present accumulation period to fewer than 90 days.

The certification of change in status was submitted to comply with regulations promulgated under the Resource Conservation and Recovery Act, as amended. U.S. EPA required the certification of change in status when GE requested a change in status from a storage facility to a generator.

The certification and related background materials are available at U.S. EPA, Waste Management Branch, 230 S. Dearborn Street, 13th Floor, Chicago, Illinois, (312) 886-1657, from 8:30 a.m. to 4:30 p.m., Monday through Friday. These materials may be seen during business hours at the Conneaut Public Library, 282 State Street, Conneaut, Ohio.

Public comments concerning the certification of this action are invited by U.S. EPA and will be accepted through March 18, 1985. Please send coments to:

News-Herald - Aug. 15, 1986

PUBLICATION

The United States Environmental Protection Agency (U.S. EPA) has received a permit to allow certification submitted by General Electric Company (GE) for its Hazardous Waste Plant located at 8400 and 8400 1/2 Avenue, Cincinnati, Ohio. GE has stored hazardous waste (as defined by Federal law) in containers and tanks. The change in status for this facility was effected by removing the hazardous waste storage longer than 90 days and by limiting the present generation to fewer than 25 days. This action has changed the status of GE to that of a generator storing for fewer than 90 days (see Title 40 Code of Federal Regulations 261.11). This certification change in status was submitted to satisfy regulations promulgated under the Resource Conservation and Recovery Act (RCRA), as amended. U.S. EPA required the certification of change in status when GE requested a change in status from a storage facility to a small quantity generator. In order for U.S. EPA to fulfill its obligations under the Hazardous and Solid Waste Amendments of 1984 (the 1984 Amendments), it must ensure that change of the currently regulated hazardous waste management unit is performed in a manner that protects public health and the environment, and that the release of hazardous waste or waste constituents from current or past solid waste management units are also controlled. In addition to the action necessary to protect public health and the environment, solid waste management units may include landfills, surface impoundments (ponds, ponds, etc.), tanks, waste piles, tanks, containers, storage areas, disposal units, and any other activity that is, or was ever, used to manage solid waste (liquid or contained gaseous waste). The public is hereby encouraged to provide technical information as to any known releases (date,

type, of hazardous waste or hazardous waste constituents to air, surface water, groundwater or soils.

The certification and related background materials are available to the public at the U.S. EPA, Solid Waste Branch, 300 South Dearborn, 13th Floor, Chicago, Illinois 60606, Monday through Friday, 9:30 a.m. to 4:30 p.m., during regular business hours of the Northeast District Office for the Environment, Protection Agency, 1112 Aurora Road, Lombard, Illinois 60148-0001.

Public comments concerning the certification of this action are invited by the U.S. EPA and will be accepted through September 15, 1986. Please send comments to:

REQUEST FOR CHANGE IN STATUS TO:

"GENERATOR ACCUMULATING WASTE ON-SITE IN COMPLIANCE WITH 40 CFR 262.34"

(APPLICABLE TO FACILITIES WHICH, AS OF NOVEMBER 19, 1980, HAVE BEEN
STORING WASTES IN CONTAINERS AND/OR TANKS ONLY)

Facility Name:	General Electric Company	RECEIVED JAN 07 1985 WMD-RAMU EPA, REGION V
	Conneaut Base Plant	
Facility Location:	Reig & Maple Avenues	
	Conneaut, Ohio 44030	
Mailing Address:	(SAME)	
U.S. EPA ID No.:	OHD 004 202 735 G7SD, PA-9	

1. I certify, in reference to the above-named facility, that a complete and accurate description of the activities currently conducted, for purposes of the Resource Conservation and Recovery Act (RCRA), are those of a generator accumulating waste on-site, in compliance with 40 CFR 262.34. This description of activities shall be considered effective as of
August 27, 1984
(please type, in above space: today's date,
or other appropriate past date)
2. I certify that all hazardous waste which had been stored at this facility for greater than 90 days have been permanently removed, and -- for that portion of the wastes that were present on-site on or after November 19, 1980 -- the manifest requirements of 40 CFR Part 262 have been complied with, and all manifests are on file at this facility, available for inspection by authorized State and Federal officials.
3. I finally certify under penalty of law that I have personally examined, and am familiar with the information submitted in this document and all attachments, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

Cleveland, Ohio 44112

RE: Withdrawal of Part A
(Storage fewer than 90 days)
Facility Name: General Electric Company
Conneaut Base Plant
U.S. EPA ID No.: OHD 004-202-735

Dear Mr. Apple:

This is to acknowledge receipt of your August 27, 1984, letter requesting the withdrawal of the Part A Hazardous Waste Permit Application for the referenced facility. The request stated the facility would like to be considered a generator of hazardous waste only, and accumulate those wastes on-site for fewer than 90 days according to 40 CFR 262.34 (enclosed).

Based on the Agency's information, however, the facility has stored hazardous wastes for longer than 90 days at some time since November 19, 1980. Therefore, the facility is subject to the closure requirements in 40 CFR 265 Subpart G. Your obligations under these requirements may be satisfied by completing the enclosed "request for change in status," having it signed by an appropriate individual per 40 CFR 270.11 (enclosed), and submitting it to the following address:

RCRA Activities
U.S. EPA, Region V
P.O. Box A3587
Chicago, Illinois 60690-3587

After our receipt of the properly executed request, we will publicly notice your change in status. Upon completion of the public notice period we will notify you in writing of your regulatory status.

This will eliminate the need for a Resource Conservation and Recovery Act permit at your facility. Please contact Ms. Rebecca Strom at (312) 886-6194, if you have any questions.

Please refer to "Withdrawal of Part A (Storage fewer than 90 days)", in all telephone contacts and correspondence on this matter.

Sincerely yours,
